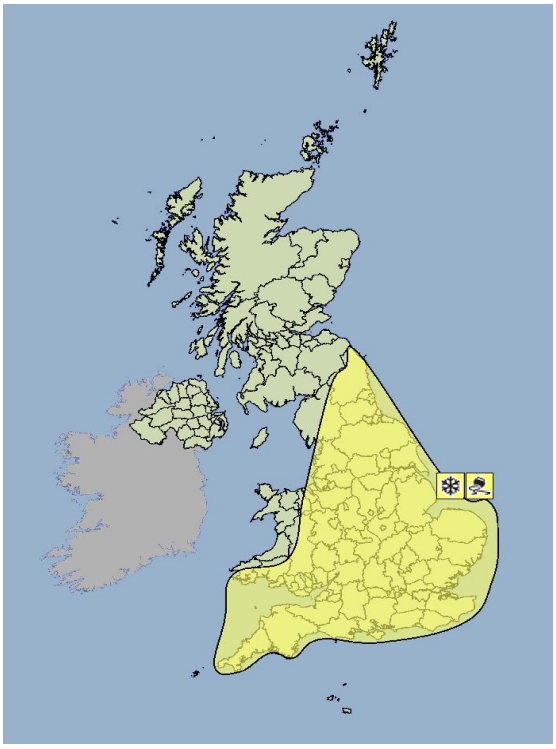
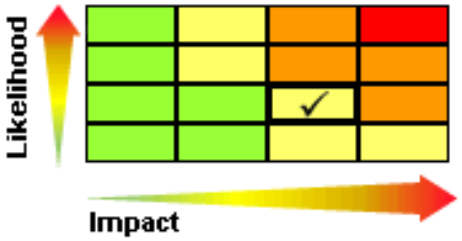
National Severe Weather Warning Service





Chief Forecasters Assessment
Not all places will see snow showers but where they do occur they may be organised into bands, resulting in locally 3 to 6 cm accumulating. Some melting of lying snow is expected during the middle of the day. There is a lower likelihood that more widespread falls of 5 to 10 cm may affect parts of the region, with 10 to 20 cm on hills.

Ice and significant wind chill will be further hazards.

The Met Office have issued a **Yellow Warning** of **Snow and Ice**

Valid from **00:05 on Sun, 18th Mar 2018** until **23:55 on Sun, 18th Mar 2018**

Snow showers are likely to continue throughout Sunday, with a chance that longer spells of snow may affect southern regions for a time on Sunday.

There is a chance of travel delays on roads with some stranded vehicles, along with delayed or cancelled rail and air travel. There is a chance that power cuts could occur. There is a small chance that some rural communities could become cut off. Icy surfaces may increase the risk of accidents and injuries. Significant wind chill will be another factor.

This warning has been updated to slightly adjust the western boundary westwards. Note also that Amber warnings have been issued for areas currently considered most likely to see greater impacts.
